

“

*“We have been using BlueMorph UV units for over 2 years. We now have them at multiple facilities and have seen firsthand how effective and reliable their patented technology is. Reducing chemicals as a winemaker is always beneficial since you have less worry of the product being affected. The savings in chemicals and water are also tremendous - allowing us to stay on the forefront of sustainability.”*

*Randy Ullom, Winemaster  
Jackson Family Wines*

***The World's Only Waterless, Chemical Free,  
Tank Sanitizing System.***

  
**BlueMorph**

[www.bluemorph.com](http://www.bluemorph.com)

**BlueMorph UV is an innovative technology that utilizes ultraviolet light to efficiently sanitize tanks and barrels. This new innovative process reduces water, energy and chemical usage.**

**BlueMorph UV  
Tank Sanitation  
Technology Provides  
Increased Safety,  
Decreased Work  
Load and Impressive  
Energy Savings.**

**SAFETY** - Chemicals can be extremely hazardous, presenting risk to employees and driving up Workers Comp Rates. These toxic elements can be environmentally disastrous during exposure and disposal. BlueMorph UV technology eliminates ALL these dangerous risks to your winery and the environment.

**ENERGY SAVINGS** - The BlueMorph UV technology will eliminate your water and chemical use. Energy reduction is a key benefit that BlueMorph UV provides, with many users receiving water and energy incentives.

**FAST & EASY** - Merely insert the BlueMorph UV device in the manway and turn it on. The BlueMorph UV does the rest. Tanks can be fully sanitized in less than 30 minutes.

**ROI** - BlueMorph UV devices can pay for themselves in as short as 3 months. Your salesperson can provide you a customized pay-back plan designed for your winery's specific needs.

**TRACKABLE DATA** - Each BlueMorph UV unit records the time of day the tank is sanitized, the duration of the sanitization and that the full cycle was completed. This data is stored in a removable SD card and exportable to excel software.

**PRODUCTS** - We offer a variety of BlueMorph UV units based on your tank or barrel needs and preferences. Please discuss your needs with a salesperson for the appropriate product and savings for your uses.

U.S. Patent #9,707,306

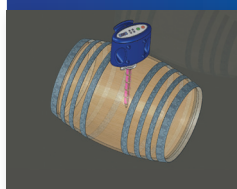

### Large Tanks - UVT200K

RECOMMENDED TANK SIZE: **15,000 - 220,000 Gallons**  
EMITTER TIME: **20 - 35 Minutes**

### Midsize - Smaller Tanks - UVT6K / UVT2K

RECOMMENDED TANK SIZE: **3,000 - 12,000 Gallons**  
EMITTER TIME: **20 - 30 Minutes**  
SMALL TANKS - UVT2K: **500 - 3,000 Gallons**

### Barrels - UVT60G

RECOMMENDED SIZE: **Average Barrel, 60 Gallons**  
EMITTER TIME: **5 Minutes**

**ColloPack Solutions**  
Sales: (707) 258-3940
